

PILGRIM-Manifesto 2017

For the PILGRIM-certification on June 12, 2017

Based on our religious convictions and other experiences, we at PILGRIM have created a knowledge network with the vision of a comprehensive education for all walks of life. The goal of this education is to see the world in a new and comprehensive way that encompasses challenges such as climate change, migration, technical transformation and social differences. Documents from churches, religious communities and the political realm serve as welcome and solid foundations.

We believe that our planet Earth and the whole cosmos is creation itself. We therefore stand for and are engaged for the ideas that:

- The one world derived from natural resources should be treated with care so that it will continue to be available to future generations;
- An economy, which assures every participant the right to existence and pays every worker sufficiently to have a secure existence;
- Social collaboration, that acknowledges the person as an individual with rights and values, and that enables a life of freedom and security;
- A view of life and the world that exerts meaning and encompasses wonder, joy, prudence, and respect for all, and serves as a springboard of value and responsible trade;
- Education that takes seriously all of these themes in a comprehensive way, encompassing physical objects and all religions and leads to a world of enlightened consciousness of the future.

These ideals are strengthened by our signature and dedication to concrete action in all realms of personal and professional life.

Translated by Lee A. Brudvig, Retired US diplomat,
Honorary member of PILGRIM, South Africa

PILGRIM
LIVING CONSCIOUSLY • GIVING FUTURE

PILGRIM
TUDATOSAN ÉLNI • JÖVŐT ADNI

PILGRIM
ZYJĄC ŚWIADOMIE • BUDUJESZ PRZYSZŁOŚĆ
